SUMMARY

Data Scientist with a strong foundation in Statistics and experience developing predictive models, performance indicators, and business intelligence solutions. Skilled in statistical modeling, time series forecasting, and data automation. Proven ability to transform complex datasets into actionable insights that support strategic decision-making.

Focused on applying advanced analytics to drive measurable business impact, improve operational efficiency, and enable data-driven strategy in private-sector environments.

EXPERIENCE

Data Specialist Mar 2025 – Feb 2026
Moody's Analytics *Heredia, Costa Rica*

- Own regional data feeds supporting complex global datasets, including firmographics, financials, shareholder structures, and corporate hierarchies, with responsibility for data quality, validation, and timely publication
- Perform analytical investigations into data quality issues, identifying root causes and coordinating with Data Governance, Technology, Product, and external data providers to resolve complex discrepancies.
- Maintain operational documentation and data-change processes to ensure traceability, consistency, and reliable communication across stakeholders.
- Design and implement workflow automation and process improvements that reduce manual effort, strengthen data quality monitoring, and improve operational efficiency.

Data Analyst – Institutional Research Mar 2025 – Feb 2026
Observatorio de Datos Institucionales – Universidad de Costa Rica *San José, Costa Rica*

- Developed a composite bibliometric performance index evaluating 1,800+ researchers using multi-source datasets (Scopus 2019–2024)
- Designed weighting, normalization, and outlier treatment methodologies to ensure statistical robustness and comparability.
- Built interactive Power BI dashboards used by institutional decision-makers for performance evaluation and strategic planning.
- Automated data processing workflows to improve reporting efficiency..

Research Data Analyst Mar 2024 – Dec 2024
Escuela de Estadística – Universidad de Costa Rica *San José, Costa Rica*

- Conducted comparative statistical analysis of aging and frailty indicators using national and international survey datasets.
- Harmonized cross-country variables to ensure methodological consistency and comparability.
- Generated analytical insights to support applied research and academic publications.
- Performed data validation, cleaning, and statistical modeling in R and Stata.

Statistical Modeling Analyst Aug 2023 – Dec 2023
Centro de Investigación en Matemática Pura y Aplicada (CIMPA) *San José, Costa Rica*

- Developed flexible time series models (GAMLSS with spline components) and compared performance against ARIMA benchmarks.
- Designed Monte Carlo simulations to evaluate model robustness and uncertainty.
- Documented reproducible workflows for research and applied statistical modeling.
- Delivered performance evaluations on location, scale, and shape parameters.

Survey Data Analyst Aug 2023 – Dec 2023
Actualidades Survey 2023 *San José, Costa Rica*

- Participated in survey design, data collection, and statistical analysis.
- Ensured data quality control and consistency.
- Produced analytical reports summarizing key findings for applied research.

EDUCATION

Universidad de Costa Rica Mar 2020 – Dec 2025
Bachelor's Degree in Statistics *San José, Costa Rica*

SKILLS

Programming: R, Python, SQL, Stata

Business Intelligence & Visualization: Power BI, Tableau

Analytics & Modeling: Predictive Modeling, Time Series Analysis, Neural Networks, Model Validation, Monte Carlo Simulation

Data & Reporting: Data Cleaning, Data Transformation, KPI Development, Performance Metrics, Dashboard Development, Microsoft Office

Languages: Spanish (Native), English (Advanced).
